DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 7, 15-16, 19-21, and 25-30, drawn to a portable telephone terminal which can establish data communication with a first image processor (digital camera) wherein transmitting/receiving images between the two devices, classified in class 455, subclass 66.1.
 - II. Claims 17-18 and 22-24, drawn to a portable telephone terminal that can establish data communication with a server of a communication system wherein transmitting/receiving images between each other, classified in class 455, subclass 344.

2. The inventions are distinct, each from the other because:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group II has separate utility such as a method/apparatus for controlling operation of a portable telephone terminal that can establish data communication with a server of a communication system wherein transmitting/receiving images between each other. See MPEP § 806.05(d).

Art Unit: 2685

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, have acquired a separate status in the art because their recognized divergent subject matter, and a different search is required for all groups.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
